

10,000 years in our Traditional Homeland, Prince William Sound, the Copper River Delta, and the Gulf of Alaska

DENR Technician II

This is a mid-level technician position within the Native Village of Eyak's Department of the Environment and Natural Resources working on established programs both in the field and office. This position supports project managers in successfully conducting research in fisheries and wildlife, and may also be utilized in environmental programs. Travel and frequent fieldwork in remote areas for extended periods of time will be required.

The incumbent performs a variety of routine work within established policies and procedures, and receives detailed instructions on new projects and assignments.

Team: DENR

Reports to: Natural Resources Coordinator

Salary Status: Non-Exempt from Overtime

Salary range: \$14.00-\$18.00 per hour

Schedule: Seasonal, Full Time,
April 25 – mid/late July

Responsibilities/Duties

- Work safely and effectively in a group, and independently.
- Collect reliable and accurate data following an established protocol.
- Apply TBA-PIT Tags, collect biometrics and genetic samples on large adult Chinook salmon.
- Successfully identify adult Pacific salmonids to species level at any point in their metamorphosis from ocean-phase to spawning-phase.
- Assist with data Quality Assurance/Quality Control following an established protocol.
- Assist with the coordination of Tribal education opportunities.
- Logistical support including, but not limited to, helicopter sling loading, ordering gear and supplies, delivering supplies to remote sites, assessing and reporting on field conditions, determining points of access/egress to remote sites, conducting safety briefings, camp mobilization/demobilization, camp operation and maintenance.
- Other duties as developed and assigned.

Competencies/Knowledge/Skills/Abilities

The incumbent must have the following knowledge, skills and abilities; the ability to take direction from supervisors and work in a team environment; ability to live and work harmoniously with a small group of peers in a tobacco/drug/alcohol-free environment for extended periods of time; ability to work well in a remote environment with minimal privacy and limited communication resources; ability to work for long hours over difficult terrain in inclement weather; proficiency in carrying firearms as a bear deterrent; knowledge and skills to operate a variety of power boats with a high level of competence, swift water boating experience is preferred; ability to trailer, launch and recover boats from 18'-24'ft; ability to safely operate boats single-handed or fully laden with personnel, gear, and/or equipment; ability to properly maintain engines, boats, tools and equipment; ability to troubleshoot, diagnose and repair

10,000 years in our Traditional Homeland, Prince William Sound, the Copper River Delta, and the Gulf of Alaska

mechanical and electrical equipment including outboard motors, generators, computers, alternative energy systems, appliances, etc. Must have a knowledge of basic power tool operation and the ability to complete work safely and efficiently using power and hand tools. Must have a working knowledge of The Scientific Method, with an emphasis on techniques for biological research and analysis; strong research, writing and verbal communication skills, including experience with data quality assurance/quality control, and scientific report writing; Strong computer literacy, including working knowledge of Microsoft Word, Excel, PowerPoint, GIS, internet browsing and email applications. Must have the physical ability to work long hours outdoors, with strength, endurance and patience to continually lift and carry very heavy objects over uneven terrain routinely.

**Experience Requirement
Required**

Minimum two years of experience working in the biological sciences. Three months' experience with remote field research, sampling and data collection. Must have boat operation experience.

Preferred

Three months or more working at remote Alaskan field sites, building, maintaining and operating fish wheels, safely capturing and handling large adult fish, T-bar or PIT tagging, collecting biometric data and collecting specimens, aquatic invertebrate sampling; Experience with fisheries/wildlife research, including trapping and handling of large fish, mammals and birds, collecting specimens, telemetry, and identifying Alaskan mammals and birds; Professional experience working in remote locations in the Alaskan outdoors; Experience working with Alaskan Tribes, and knowledge of subsistence resource issues.

Education Requirement

BS or BA in a scientific field, OR college student with a declared major in a science related field and minimum 2 year completed coursework, OR 2+ year work experience in fisheries or similar field. Relevant experience may be taken in lieu of education.

Performance Standard

The work is performed both in the office and outdoors. The position may require a considerable amount of physical activity while conducting fieldwork, including; continually lifting, handling and releasing Chinook salmon up to 70 lbs., hiking and climbing over difficult terrain, sparing and adjusting fishwheel locations. The employee will be required to stay for extended periods of time in remote camps (up to 3 months). The position requires that applicants are in sufficient condition to perform physically demanding tasks. The use of hand, eye and muscle coordination to safely operate boats, power and hand tools is required.

Environmental Factors

Majority of work will be completed out of doors. Possibility of remote/cold water survival situations. Work will include exposure to severe weather (heat, cold and wet), hazards associated with power tools, hazards associated with traps to collect fish, and working in areas containing
